

Online Research Bibliography of Written Language & Literacy

Version 12

- 10,741 bibliographic entries -

Compiled and edited by Terry Joyce [terry@tama.ac.jp]

© February 2024

Version **12** of the ORBWLL data consists of **10,741** bibliographic entries based on consulting and processing **4,500** source bibliographies.

The **10,741** entries include the **4,500** source bibliographies, which were selected based on their status as authoritative works within the literature and/or on their inclusion within a selection of prestigious academic journals dedicated to scripts, reading, written language and literacy issues.

The other **6,241** entries are works that are consistently cited by a certain number of the source bibliographies, indicating their relevance and importance for written language and literacy research.

In compiling the bibliographic data, efforts have been made to eliminate the errors that are frequently encountered within reference lists, but, undoubtedly, mistakes remain. Accordingly, the compiler sincerely asks to be informed of any inaccuracies discovered, so that they can be corrected in future updates. The compiler would also be most grateful for recommendations for works that warrant inclusion within ORBWLL.

NB: An online version (<http://faculty-sgs.tama.ac.jp/terry/awll/orbwill/index.html>) also includes *Cited by* information for the majority of entries, based on the **79,713** citations among the source bibliographies. For that reason, it may be most beneficial to also consult the online version in combination with this PDF version.
